

YOUR SPEAKERS

COURSE DIRECTOR

scientific director of DFTA-TZ, responsible, speaker and Prof. at the Media University Stuttgart

Prof. Dr. Martin Dreher

SPEAKER, LAB ENGINEER

Speciality: Repro, Plate Making, advanced Flexography

Dipl. Ing. (FH) Dennis Grotian

SPEAKER, LAB ENGINEER

Speciality: Basics, Printing Inks, Substrates, advanced Flexography

B.Eng. Nils Hirche

SPEAKER, LAB ENGINEER

Speciality: Substrates, Printing Presses, advanced Flexography

B.Eng. Dietmar Wolf

SEMINAR

ADVANCED

FLEXOGRAPHY

July 02nd 2012

through

July 6th 2012

alles flexo

BASIC INFORMATION

DFTA-TZ, Institut der Steinbeis GmbH für Technologietransfer: Printing Technology Institute for Flexography and Packaging Printing; we define our institute as being dedicated to flexography, with the promotion of the level of education of its employees as one of our main objectives. Our training courses satisfy the need for general flexographic education as well as the demand for advanced skills in flexographic printing parameters. Complementary to our training facilities we employ far reaching machinery down to a practical production flexographic printing press. Please find more information on our Website <http://www.dfta.de>

Advanced Flexography

**G1 July 2nd, 10:00 h through July 6th 2012
approx. 14:00 h**

TARGET GROUP

The seminar is suitable for flexographic beginners and advanced flexographic specialists, apprentices, qualified persons with skills in other printing methods or packaging applications, flexographic press operators with no dedicated education, pre-press specialists etc.

COURSE FEE

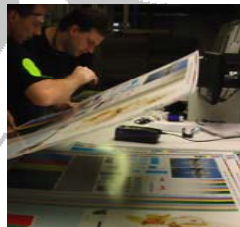

Regular charge 1.875 €

Charge for DFTA-Members 1.250 €

The course fee includes course documentation printed (colour) in binder and on CD, beverages, snacks and lunch meals.

Not included are travel cost and expenses, hotel accommodation and evening meals.

COURSE TOPICS

The training course will introduce flexography and other printing methods on a beginner level, but then quickly turns to advanced levels of prepress with its sections of repro and plate making. Further advanced contents comprise printing inks, colorimetry and colour measurement, anilox rollers, unrolling of cylinders, press speed, impression, measurement technology and trouble shooting, as well as intensive practical exercises. For easier didactical reference the practical exercises are carried out on our full scale printing press (CI).

Condensed and comprehensive training course for late beginners and advanced flexographic specialists; covers the technical details and particularities of high quality FLEXO technology and describes the requirements for achieving optimum print quality in detail.

This course starts at a beginner level, but quickly transforms into an advanced FLEXO course with the respective requirements for understanding the basics of printing (which may not be covered altogether for time reasons in the introductory sections). Therefore, some basic skills in printing technology and a high level of learning motivation are mandatory for the participants.

DISCOUNT

We offer to our participants an early booking discount about 1.5 % per month before the course starts. If you are interested in a bulk discount please contact us.

HOTEL RESERVATION

We are glad to help you book your hotel rooms if you wish. We have negotiated special rates for our course participants at a number of middle class hotels. Rates range from 63 € (fair quality, S-Bahn transfer required), approx. 70 € (walking distance, some rooms quite small) and 75/100 € (medium distance, car or taxi required, partly exhibition rates). The rates are meant for a single room per night with breakfast included.

REGISTRATIONS AND QUESTIONS

If you need any help or information about the registration please do not hesitate to contact us

Fon +49 (0) 711 678 96-0
Fax +49 (0) 711 678 96-10
info@dfta.de

For cancellation up to 4 weeks prior to course start at no extra charge will be required. Exchange of persons by the delegating company is possible up to course start at no extra charge. Registrations are binding after written acknowledgement by the DFTA TECHNOLOGY CENTER.
